	Session Theme: Food Microbiology supporting the Future Session Chair: Cathy Moir, Senior Food Microbiologist, CSIRO Agriculture and Food Presented by: AIFST Food Microbiology Special Interest Group Overview: This session will hear views from industry, government and researchers on what we know, what have we learnt and what we need to do to remain relevant into the future and ensure we keep producing safe food.	Session Theme: Key Nutrition Trends for the Future Session Chair: Sharon Natoli, APD, Food and Nutrition Australia Presented by: AIFST Nutrition Special Interest Group Overview: Products that offer a health and wellness benefit continue to capture an increasingly greater share of the global food market. While reducing fat, salt and sugar are often the focus of reformulation efforts to make foods 'healthier', consumers are now expecting more. Learn key trends and understand how consumers definition of what constitutes 'healthy' food will evolve and change in the future.	Session Theme: Building capability for the future of food science - education for the future Session Chair: Duncan McDonald, AIFST NED Overview: Nelson Mandela said that education is the most powerful weapon which you can use to change the world. The world of food science and technology is changing rapidly and as an industry we need to ensure that we keep up to date with changes. It is also vital that we support education in schools and universities so that we have a new crop of food scientists and technologists coming through the ranks. This session looks at what we need to do now to develop the food scientists of the future. 	<p>Session Theme: Microbiological food safety and new technologies.</p> <p>Session Chair: Deon Mahoney</p> <p>Presented by: Australian Association for Food Protection (AAFP)</p> <p>11th AAFP/bioMérieux Food Safety Symposium</p> <p>Overview: This annual Symposium presented by bioMérieux and AAFP will focus on relevant and key food safety issues.</p>	<p>Session Theme: Personalised Nutrition</p> <p>Session Chair: Louise Bennett, Monash University</p> <p>Presented by: AIFST Nutrition Special Interest Group</p> <p>Overview: A trilogy of influences are facilitating a power shift from generalised dietary advice dispensed by institutions to tailored advice for the individual. The merging of advancing technology across food and medicine with a more informed and demanding consumer will create major change in the way food is produced and distributed in the future, providing both opportunities and implications for food manufacturers. This session will provide attendees with a view of a more personalised future for food.</p>	<p>Session Theme: The Future of Food Regulation</p> <p>Session Chair: Adam Hyland, FrankeHyland</p> <p>Overview: Australian and New Zealand share a robust food standards system and regulatory framework. That said, there has been some significant fracturing of the commonality of food laws, with Australian production standards and origin labelling, and the regulation in New Zealand of supplemented foods. The challenges of food regulation for the next decades are also likely to be quite different from those of the past. What is the future for ANZ food regulation, and how does it need to change to remain fit for purpose?</p>	<p>Workshop: Traceability</p> <p>Workshop Facilitator: Maria Velissariou, Chief Science and Technology Officer, IFT</p>	<p>SPDC Presentations & Product Defence SPDC: Product Tasting and Defence</p> <p>This is a closed tasting.
