

## 2019 CRITERIA FOR JUDGING POSTER PRESENTATIONS

Poster presentations are judged on four principal criteria:

- Originality
- Quality of the research or review and the research approach
- Scientific and commercial value of the subject matter
- Presentation

The scientific and/or commercial value, i.e.: the contribution to food science and technology, is weighted at twice the other criteria.

The proposed approach is to allocate a score out of 10 for scientific/commercial value, and 5 for each of the other criteria, giving a maximum possible score of 25.
